

## BEYOND THE PROJECTOR?

Viseco was designed to work with projectors, but during development we realised other far reaching applications. Viseco takes control through infrared communication which pretty much covers most domestic and commercial electrical equipment, from

televisions and digiboxes to air-conditioning units!

If you need the features of Viseco to work with devices other than projectors contact our clever bods at: [dev@visecotech.com](mailto:dev@visecotech.com)

**TOP TIP: CONTROL OTHER EQUIPMENT AS WELL AS YOUR PROJECTOR AT THE SAME TIME WITH VISECO FOR ADDED CONVENIENCE AND SIMPLICITY.**

## SPECIFICATION

Voltage:	5.2VDC USB Power Supply
Current Consumption:	40uA (100mA IR Tx)
Power Consumption:	0.2uW (450mW IR Tx)
Channels:	6 Channels
Channel Capacity:	64 Buttons
IR Rx Wavelength:	950nm
IR Rx Carrier Frequency:	36-40kHz
IR Tx Wavelength:	950nm
IR Tx Carrier Frequency:	36-40kHz
Supported Protocols:	NEC, Phillips RC-5/6, Sony IRC, Sharp, JVC
EMC:	IEC61326-2-4:2006-06
Weight:	<100g
Operating Temp:	-10 - 85°C

## WANT VISECO?

Viseco is available for purchase direct from our website or for volume purchasing, via one of our approved resellers.

A full setup and installation service is available from your reseller.

For pricing, purchasing, availability or for a list of your nearest resellers please visit [www.visecotech.com](http://www.visecotech.com).

## PROJECTORS JUST GOT SMART GREEN AND CLEAN

Stay in control of projector running costs and present with ease and confidence.

Let Viseco be the smart and innovative replacement to your projector remote control...

## SMART, GREEN AND CLEAN

Viseco is so much more than a replacement remote control...

...it is your secure, smart and innovative little buddy, offering you an easy and clever alternative to controlling your projector!

Auto Shutdown

Touch Interface

Simple Press

Wall Mount

Our **VISECOTECH** TEAM are always looking at ways to lower your carbon footprint while making your life simpler. See what they're up to on Twitter @visecotech

## HOW IT WORKS

It's pretty simple: **replace your projector's remote with Viseco**...Hey Presto! your projector problems are solved. Viseco learns the commands directly from your projector's remote infrared signals - so no codes, no fuss.

## EASY INSTALLATION

Viseco is designed to fit nice and snugly into any standard 1-gang **back box** or **wall pattress**. Running from the **USB AC adaptor** provided, Viseco sends all infrared signals via the **5m transmitter head** - which should be located in direct-view of your projector.

With just some simple tools you'll have Viseco up and running in no time. Start enjoying the simple life!

## BENEFITS

### AUTO SHUTDOWN

Forgetfulness need not be costly! Viseco ensures your projector is switched off safely should it slip your mind. Set a time that Viseco should wait before automatically sending the OFF signal to your projector. Become an Eco-warrior overnight!

### TOUCH SENSITIVE

Viseco offers a robust and hygienic touch-sensitive user interface. The wipe-clean design allows for effective cleaning and disinfection, lowering any chances of cross contamination between users. Squeaky clean hey?

### SIMPLE PRESS

No more flustered presentations with Viseco's simple press interface. Customise Viseco by storing your most used projector functions and/or group together multi-button press functions into a single button press. Keep it simple, we say!

### WALL MOUNT

Say goodbye to lost or stolen remotes. Know where Viseco is at all times with its secure, wall-mounted design. Compatible with all standard electrical and network back boxes or pattresses. Fort Knox meets projectors ;).

## About Us

Projectors can be costly beasts; with both your money and our environment. However, they're also indispensable throughout education and business, so here at Visecotech, we've been developing neat ways to help you reduce the **cost**, **complexity** and **environmental burden** of your projector... and we think we've found it. Simply replace your remote with Viseco and become one smart cookie...

We've spent months studying how you used your projectors and through our extensive research we found some interesting points...

Many users forgot to **switch off their projectors** consequently running up unnecessary bills and reducing valuable bulb life.

We noticed how **flustered and confused** you became when using an unfamiliar projector remote even for only a few basic functions.

To our amazement we found that one in ten of our users had **lost or misplaced** a projector remote - sometimes midway through a presentation! Replacing lost or stolen remotes is unnecessary but unavoidable expense.

Finally, we let loose our microbiologists on your remotes. Shockingly we found a whole **host of bugs** living happily amongst the buttons. Many harmless, but a few undesirable!

## A PROJECTOR MONEY PIT

What makes projectors so expensive? To demonstrate this, we've broken it down into three areas...

01

Electricity

The cost of electricity to run the projector.

02

Light

Bulbs and LED arrays need replacing.

03

Remotes

Lost and stolen remote replacement.

Keeping those costs down is a piece of cake with Viseco's smart, projector friendly, auto shutdown feature. Those Forgetful Freddys will never leave a projector accidentally running again!

Visit [www.visecotech.com](http://www.visecotech.com) and calculate the savings Viseco could make for you...
